

# NGVs SERVE AMERICA'S WORK FORCE WITH AMERICA'S FUEL

**P**ublic and private fleet operators all across America rely on trucks powered by clean, economical, abundant and domestically produced natural gas to deliver their goods and services. There are natural gas-powered pick-up

Telecommunications, gas, electric, and water/sewer utility companies use a variety of light-, medium- and heavy-duty NGVs to get the job done. Over 98% of our natural gas comes from North America.

trucks, commercial vans, walk-in vans, 'cab-over' and conventional trucks and specialty vocational trucks available to meet your needs. Whether

buying a factory-built work truck from a leading OEM or having

a qualified installer repower or retrofit your new or existing vehicle with an EPA- and/or CARB-certified system, you can be assured of clean, reliable, powerful performance and 30-50% lower

Food and beverage distributors, laundry services, package couriers, home furnishing and appliance retailers are examples of businesses that are saving money using NGVs.

operating cost. High-fuel-use fleets that operate within a defined region are great candidates for NGVs, whether using the available local CNG station network or installing fueling capability at their central depots.

To reduce emissions, several port authorities are requiring accelerated replacement of diesel trucks with CNG and LNG yard hostlers and local drayage trucks.
