MEDIA RELEASE

Advocating the increasing use of NGVs where they benefit most.
For the economy. For the environment. For health. For security. **For America.**

North American NGV Conference & Expo Slated for Atlanta, Ga., November 18–21

Washington, D.C. — March 3, 2013 —NGVAmerica announced today that it will host the 2013 *North American NGV Conference & Expo* at the Georgia World Congress Center (GWCC) in Atlanta, Ga., November 18–21. This is the first time in nearly two decades that NGVAmerica has hosted its annual conference in the Southeast, last convening in Atlanta in 1994 and Orlando in 1992. NGV market development in the Atlanta metro area and, more generally, in the southeast region was a major determinant in selecting Atlanta for this event, which is recognized as the premiere NGV industry event of the year.

Themed “Transportation Fuel for a Better Bottom Line,” this year’s program will feature multiple tracks with breakout sessions addressing how to further accelerate NGV market development to create American jobs, energize our local and national economies, reduce businesses’ transportation costs and help American consumers stretch their budgets, all while improving our environment and strengthening our energy independence. Sessions will include fleet operators sharing their experiences and practical, real-world suggestions on how to successfully transition fleets to natural gas, clean transportation advocate-allies’ tips on getting legislators to pass smart energy and transportation policies that encourage investment in our abundant domestic resource, and industry stakeholders’ proven strategies to successfully develop a robust NGV market.

The 2013 event also marks the return of an exposition featuring the full breadth of light-, medium- and heavy-duty vehicles from OEM and retrofit system suppliers, fuel station equipment and services providers, and a variety of public and private program implementation experts ready to assist you in assessing options and moving your efforts forward. The program’s breakfasts, lunches, three receptions, awards dinner (with a special guest entertainer) and other social functions provide registrants with plenty of time to network, share ideas, exchange lessons learned and collaborate.

NGVAmerica has secured very favorable discount lodging block rates with three nearby hotels, just a minute or two walk from the Georgia World Congress Center and the MARTA system, making travel easy and cost-effective.

More information about program agendas, lodging and registration rates—including special discounts for qualified fleet operators—will be posted on NGVAmerica’s web site soon. In the meantime, save the date on your calendar and make plans to attend.

About NGVAmerica

NGVAmerica is a national organization dedicated to the development of a growing, profitable, and sustainable market for vehicles powered by natural gas or biomethane. NGVAmerica represents more than 200 companies, environmental groups, and government organizations interested in the promotion and use of natural gas and biomethane as transportation fuels. Our member companies are those that produce, distribute, and market natural gas and biomethane across the country; manufacture and service natural gas vehicles, engines, and equipment; and operate fleets powered by clean-burning gaseous fuels. For more information about NGVAmerica, visit www.ngvamerica.org.
