

Available Certified or Approved NGV Aftermarket Conversion Systems: Light-Duty Vehicles and Heavy-Duty Chassis

The information contained in this document covers aftermarket conversion systems that consumers and businesses may purchase in order to modify new or used vehicles so that they can operate on natural gas. Some of these systems may be ordered directly through automotive dealerships when placing an order for a new vehicle. However, all of the systems listed here are aftermarket from the standpoint that they are offered as modifications to original equipment manufacturer (OEM) gasoline or diesel fueled vehicles.

The information is organized by certified or approved light-duty vehicles and by heavy-duty chassis. Heavy-duty engines are now listed in a separate document. The individual sheets are further organized by OEM (e.g., Chrysler, Ford, or GM), model year, and engine size, so that persons interested in a conversion system for a particular vehicle may quickly locate it. All of the systems listed have been either certified or approved by the U.S. Environmental Protection Agency (EPA) or the California Air Resources Board (CARB). Please do not contact NGVAmerica regarding the availability of aftermarket systems. NGVAmerica does not sell conversion systems or provide any services related to the installation of such systems.

Please review the listings of available systems and also the websites of the companies who offer them.

For future updates of these documents, visit the NGVAmerica [website](#).

List of abbreviations:

- EPA Cert.....U.S. EPA Certified
- CARB.....California Air Resources Board
- Int Appr.....Intermediate Approval by U.S. EPA
- OUL.....Outside Useful Life
